

CARE TRUST

Care Trust

An initiative to forge a better society for everyone to live with respect and dignity.

“An investment in knowledge pays the best interest”

“Hygiene is two thirds of health”

“The earth is what we all have in common”

A step forward towards betterment of underprivileged women and children.

WHO ARE WE?

Care Trust is a Noida (U.P) based non-governmental organization working for the underprivileged children and women to provide them with educational opportunities, better healthcare facilities and protection from any type of exploitation. It is very difficult to live a life without freedom over one's own life and this is almost the case with all underprivileged children and women in India. We aim at bringing a change in the society by giving them the respect that they deserve and guiding them in every phase of life be it right to education or women health by improving personal nutrition, health and hygiene. Our team comprises of scholars from the field of education, communication, health, nutrition and women hygiene. We aim in ensuring that there is provision for the continuous care of the society. It will not only lead to the betterment of the targeted group's health but it would somehow lead to an educated youth and empowerment of women for a better nation.

Child Education Drive

MUSKURAHAT:
Toy and Stationary Distribution

NAAZ:
Nourishment of Menstrual Cycle

AASIA:
Animal Welfare Drive

GUL:
Environment Welfare Drive

WOMEN WELFARE

Aim

In this campaign, we are dedicated to nurture, nourish and preserve the menstrual cycle of a woman. It is imperative to note and understand that the vitality of the menstrual cycle is firmly linked with the physical and mental well-being of a woman. The irregularities in the menstrual cycle cost her comfort and confidence where her regular affairs become distressful and leaves her in constant dismay. We aim to create an environment where a woman doesn't have to compromise with her self-worth. It is an upshot of our lack of awareness, constant ignorance and entrenched notions against natural phenomena.

Plan Of Action

The creation of the congenial atmosphere for women requires an active participation of people with sincerity and faith in the idea of co-existence. We need your support and cooperation in this timeless campaign and you can contribute in creating a comfortable physical and mental state for a woman by donating a minimal amount of rupees 35 in our trust. The amount will be used in the procurement of sanitary pads for women who are unable to purchase the same due to lack of money and awareness, compromising directly with their hygiene and health. The primary concern of our campaign is the physical and mental well being of women working in unorganized sectors. We will reach out to them directly and make them aware with the importance of the vitality of their menstrual cycle, the value and benefits of hygiene in keeping it intact, and provide them sanitary pads for free.

Outcome

The nurturing, nourishment and preservation of the menstrual cycle of a woman is essential to have her participating and contributing incessantly in family, in public, in community, and in society with contentment as her major possession. We believe that the sense of inclusiveness is the key in making people care and contribute in the well-being of each other, regardless of their gender, caste and class and our action will substantiate the essence of co-existence that lies in our connect, cooperation and support. It is always better to be linked with each other rather ranked amongst each other.

CHILD WELFARE

Aim

Our Aim is to spread awareness about education and providing the underprivileged with all the basic needs so that we encourage, support and motivate them to go to school. We will also encourage them to take part in art and music besides education so that we can focus on their overall development leadership skills and the ability to deal with real life situation.

Plan Of Action

We believe that education is a fundamental right that should be made available to everyone irrespective of their financial and social background. We will also support students belonging from marginal sections of the society by awarding them scholarships to cover the expenses of the education.

Outcome

Encourage and Motivate children to go to school and get access to quality education introduce them to the Scholarship programs and create awareness of the same that will make sure that none of these children are deterred from continuing their education on account of financial hardships. Help in overall development of the children so that they are well-versed with everyday life situations.
